

# Bullhorn Power Supplies

American Innovations' power supplies satisfy cathodic protection (CP) needs, and are Built Bullhorn Tough.

## Power Supplies For:

- Bullhorn Remote Monitors
- Other applications

# Bullhorn Power Supplies

## Key Benefits

### Optimized for CP

The power supplies are optimized specifically for cathodic protection applications, are isolated, and require very low input voltage for CP in remote areas.

### Compact

Users can quickly and easily mount the power supply inside of a rectifier or Bullhorn RMU weather enclosure.

### Versatile

Power supplies can convert voltage from a solar CP installation and can be used with battery stacks of up to 36 V.

American Innovations' line of power supplies are optimized for cathodic protection applications and power needs for both AC and DC. They are available with inputs of 20W AC, 3-36 VDC, and 9-36VDC with outputs of 12VDC. The DC power supplies are isolated, which separates current flow between the rectifier and measurement system, eliminating potential measurement errors caused by ground loops. This isolation feature also adds a layer of protection for the Bullhorn remote monitoring unit from transients due to events like ESD (electrostatic discharge) and lightning.

# Bullhorn Power Supplies Specifications

DC/DC Power Supply: Isolated, 6-36 VDC in, 12 VDC out

---

DC/DC Power Supply: Isolated, 9-36 VDC in, 12 VDC out

---

AC Power Supply, Switching: 20W, 12VDC

---

## Services

Expect Relentless Service from our Remote Monitoring Technical Services team.

- Technical support is provided by NACE-certified professionals via phone and email.
- Approximately 98 times out of 100, a highly-qualified professional will answer your very first phone call and handle your questions. No call backs; no phone tag.
- We set you up for success with product training, offered at your place of business or ours.

## About American Innovations

American Innovations (AI) protects people and the environment by helping our customers safely and efficiently manage the world's energy infrastructure. We deliver proven compliance solutions to virtually every oil and gas transmission pipeline company in North America – from the field to the office. We provide an integrated family of hardware, software and professional services backed by relentless customer service. Our products include: Bullhorn® Remote Monitoring, MicroMax® Current Interrupters, Allegro Field Data PC™, PCS™ compliance software, and Risk Intelligence Platform (RIPL™) software. AI also provides a wealth of professional services including data migration, risk analysis, high consequence area (HCA) analysis, and regulatory compliance consulting.
