Bullhorn web is American Innovations' powerful cloud-based manager for the Bullhorn remote monitoring units (RMUs). It safely stores the data received from Bullhorn RMUs, and can also remotely monitor and configure RMUs, send alerts, generate customized reports, and exchange data with PCS or other applications. Accessible via web or mobile device, Bullhorn Web acts as your eyes and ears in the field – remotely monitoring, interrupting, and alarming on CP systems, compressors, tanks, LACT meters, and other assets.

Remote Monitoring For:

- Cathodic protection, gas metering, water & wastewater, agricultural applications
- Accessible via web, mobile, email, text
- Reporting, remote configuration, alerts

Bullhorn Web

Key Benefits

Instant Awareness

Bullhorn Web can be used to see the status of any monitored asset 24/7, day and night, via a web browser or mobile device, so that trends can be identified, problems solved, and equipment operated at maximum efficiency. If there's an issue with a monitored asset, Bullhorn Web can notify relevant personnel via phone call, mobile text, web alert, or email.

Efficient Unit Management

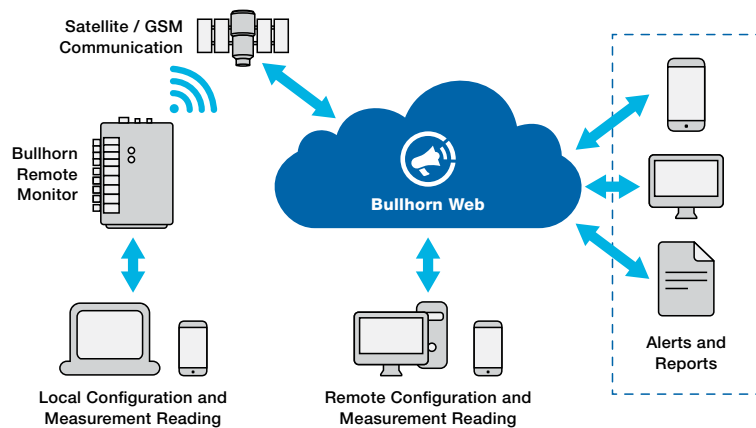

Take advantage of a single page view for unit group management, unit status and maps so that users don't have to navigate between screens to complete the most common tasks within Bullhorn Web. With two clicks or fewer, users can select a specific set of RMUs and send a command or schedule interruption for all of them.

Integrated Compliance Solution

Bullhorn Web is part of American Innovations' complete end-to-end system to prove regulatory compliance, with filtered data from RMU's easily imported into PCS where they can be made into compliance reports. Data can also be exported into other file formats for easy import into other applications.

Data Integrity

Cloud-based Bullhorn Web ensures that data is always available and accurate, backed-up, and stored redundantly.

Bullhorn Communications Architecture

For More Information

Services

Expect Relentless Service from our Remote Monitoring Technical Services team.

- Technical support is provided by NACE-certified professionals via phone and email.
- Approximately 98 times out of 100, a highly-qualified professional will answer your very first phone call and handle your questions. No call backs; no phone tag.
- We set you up for success with product training, offered at your place of business or ours.
