

# Traceable, Verifiable, Complete. Compliance Solutions For Gas

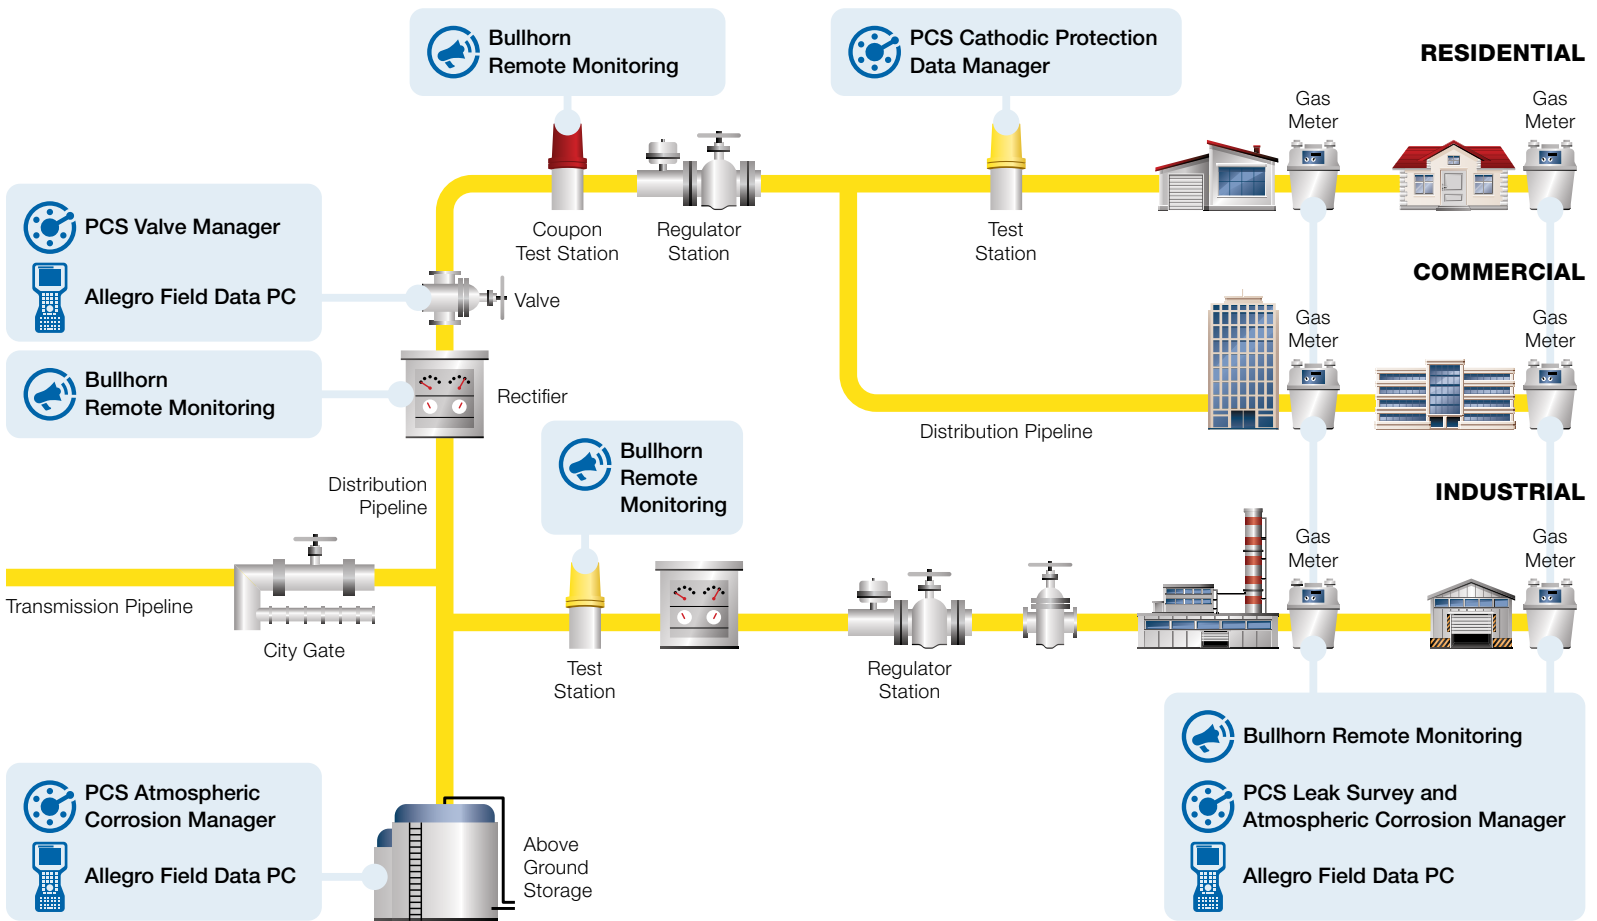

Manage the corrosion and inspection information for your DIMP in a single, integrated data system.

Gas Distribution Integrity Management Program (DIMP) managers are overwhelmed by the amount, variety and sources of corrosion and inspection data they must capture and analyze to comply with local, state, and federal regulatory requirements including 49 CFR Part 192, especially subpart P, and 74 FR 63906. American Innovations' solutions enable traceable, verifiable and complete compliance records and boost operational efficiency:

- **PCS (Pipeline Compliance System)** is an integrated data, survey, analysis and reporting solution with embedded oil and gas regulatory expertise. It is suitable for managing gas DIMP programs and encompasses initial survey data capture to back office reporting and everything in between including: audit support, performance analysis, planning and troubleshooting.
- **Allegro Field Data PC™** is a vital tool for accurate data collection.
- **Bullhorn® Remote Monitoring Units (RMUs)** monitor, collect and alarm essential equipment.

# Compliance Solutions For Gas

## Traceable. Verifiable. Complete.

PCS, Allegro, and Bullhorn form an integral part of your Gas Distribution Integrity Management Program.

### Knowledge

Maintain a “single repository of record” detailing all aspects of your system that is maintained indefinitely and updates are immediately synchronized to all users in the organization.

### Identify Threats

From leak detection to cathodic protection surveys, instantly identify risk areas or criteria violations on every segment and facility of your pipeline network. You can even configure notifications and alarms on remote monitors to receive real-time updates.

### Measure Performance, Monitor Results, and Evaluate Effectiveness

Extensive reporting and graphing capabilities with embedded oil and gas regulatory expertise provide the tools you need to assess the effectiveness of your DIMP. Targeted data enables decision support for maintenance as well as continual overall program improvement.

### Report Results

Reduce your annual report and audit preparation from weeks to hours using the extensive reporting capabilities in PCS.

# Compliance Solutions For Gas

Reliably capture gas distribution survey and inspection data into a single repository, analyze it and produce relevant reports for audits, performance analysis, operational cost control, maintenance planning and operational troubleshooting in a streamlined and scalable manner.

**Continuous Compliance.** Maintain compliance by scheduling surveys to avoid delinquencies and by creating all reports necessary for audit support and filing requirements to local, state, and federal regulatory agencies.

**Cathodic Protection (CP) & IM Reporting.** Quickly build custom reports and graphs with exactly the content and layout you need.

**Survey Routing.** Maximize CP and inspection survey productivity by optimally routing crews to the services in a grid.

**Maintenance Planning.** Streamline operations and minimize costs with maintenance decision support. Plan and budget for repairs and equipment purchases using timely data.

**Data Exchange.** Integrate with current and future IT systems and processes including GIS, risk assessment, work flow management and other external applications. Your pipeline integrity program cooperates and scales with your entire organization.
